

Hi and Welcome Back!

As you log-in to the Frameworks you will notice some updates to user information; however, please rest assured that all previous functions remain the same.

These changes are the result of the wonderful feedback we received from teachers and administrators. Please continue to share your ideas; we are here to help you! Here is a brief introduction:

- New: Home Page Calendar
- New: Data Dashboard
- New: Interventions Management System
- Same: Curriculum Frameworks
- Same: DataSmart
- Same: Log-in access

Calendar – displays the length of CF modules, “roll-over” student intervention needs (I), and District holidays.

Data Dashboard – provides information regarding student performance, enrollment, attendance, and intervention status.

Lesson Plans – access to paperless plans with split screen views, automated headers, and several formats (daily, weekly, and monthly).

These changes are a result of wonderful feedback we have received from our classroom professionals! We hope they meet your needs. If you find you need further information or in need of assistance, please call the [Help Desk for log-in issues](#) at **817-814-HELP** (4357) or email Marci Formby at [marcia.formby@fwisd.org](mailto:marcia.formby@fwisd.org) for user directions and suggestions.

**FYI: Teacher views may not show a class and enrollment mapping until campus upload. However, EVERYONE can get to the “View ALL Curriculum” view – even if enrollment data has not been entered.**
