

Educational Technology Classes Available for GT Credit

21st Century Skills for the Science Classroom

Participants experience the integration of digital applications and content through a science-centered exploration.

Creating a Photo Story 3 Video for Classroom Integration

Participants have the opportunity to plan and create individual projects with any curriculum to enhance technology skills.

Data Analysis with Excel

Participants are able to analyze data and apply it to real world applications through a high level technology application.

Desktop Publishing with Microsoft Word

Participants use advanced technology skills to heighten their learning of the TA TEKS. Participants design and create higher level technology projects to integrate throughout the curriculum.

Document Camera Projects with Movie Maker

This class promotes meta-cognitive-based learning to meet the needs of the gifted class. Participants use higher order thinking skills to plan, create, and evaluate through technology integration.

Web 2.0 in the Classroom

Participants discover and utilize technology applications to facilitate their learning experience. Participants learn through a distance-learning approach.
