About Our School

Established in 1936, McLean has a long tradition of academic excellence and vibrant extracurricular activities. It is a school where every child can find his or her place. McLean teachers and staff partner with families to develop students’ strengths and prepare students to enter high school ready to excel.

Why Choose Us?

There are multiple paths to becoming a well-rounded person, and McLean offers students many of them! Whether that means acceleration in academics, exploration of engaging electives like rhetoric, creative writing, journalism or theater, finding their musical side through a variety of choirs, bands, or orchestras, learning how to move their body in athletics, physical education, or Junior Cadet Corps, or giving back to the community through the student mentoring program, National Junior Honor Society, student council or United Voices for Change, our mission is to help students dare to be different by daring to be themselves.

We support our students’ physical, social, emotional and academic development.
